Subject: **Fulda Markt - GDSD Code and App Review**

Tuesday - February 2, 2021 2:20 PM

Hello Ahmed, Hope you are doing well.

For the code review, here are the following things that I have found in your code.

1. Through out the code, i found that it is not formatted properly.
2. Commented code can be removed.
3. Also you can remove commented markup.
4. Instead of directly keeping strings in the markup, create a resource file having all the strings so that it can be useful when you want to switch the language.
5. In the getCatagories function , you have defined a variable p : I suggest you can give more meaningful name to it so that it is easy to understand.

Please have a look at it.

Kind Regards,
Banshi Jivani
